ALTERNATIVE AND CURRENT SENETAS CN ENCRYPTORS:

Current Senetas CN4000/ CN6000/CN8000 series:

- The current and state-of-the-art CN series encryptors provide CN1000 and CN3000 customers with numerous upgrade benefits, including substantial cost benefits and 'greener' energy performance.
- Customers and partners using the CN1000 or CN3000 encryptors are encouraged to consider the alternative, 100% compatible, Senetas CN series encryptors; which use Senetas's latest, state-of-the-art encryption:
 - CN4010/CN4020 (small form-factor) Ethernet 1G
 - CN6010 Ethernet 1G
 - CN6040 Ethernet 1G, Fibre Channel 1/2/4G
 - CN6100 10G Ethernet
 - CN8000 Multi-port (x10), 1G/10G Ethernet, 1/2/4/8G Fibre Channel

Benefits of the current high assurance CN Series platform:

- Senetas high-speed network encryptors deliver high assurance data security without compromising network performance:
 - 100% mode interoperability among all CN encryptors,
 - Multi-certified best-in-class security,
 - Authenticated encryption,
 - Zero data overheads,
 - Near-zero latency,
 - Best-in-class Encryption Key Management,
 - Maximum network and application performance for the most time-sensitive and secure communications required by global financial networks and the world's largest Internet companies, Cloud and Data Centre service providers.
- The CN4000, CN6000 and CN8000 Series encryptors enable encryption of any Layer 2 network data; all network topologies and network traffic across all

location types – from the branch office to the data centre at speeds from modest 10 Mbps to high-speed 10 Gbps.

- CN6000 and CN8000 include Fibre Channel protocol support. Enabling best protection of SAN data links at speeds up to 8 GFC.
- Senetas CN Series encryptors are multi-certified. They include FIPS and Common Criteria certifications up to secret classification.
