## PROTECTING MULTI-LOCATION DATA IN MOTION Multi-site organisations rely heavily on data networks to permit the exchange of data between office locations, across the supply chain and even to

customer sites. While inter-branch communication brings a host of efficiencies, it also poses inherent security risks if sensitive data is not encrypted end-to-end.

## **ENCRYPTION?** All organisations sharing sensitive information among regional, national or international locations will benefit from encrypting network data in motion.

**SOLUTION SENETAS PAPER E-BOOK** 

Senetas encryption solutions are distributed and supported internationally (outside Australia and New Zealand) by Thales. The world leader in digital security and defence, Thales services over 30,000 customers across 180 countries. Senetas products are sold by Thales as part of its CPL solutions portfolio. Senetas is a leading developer of encryption security solutions; trusted to protect enterprise, government, defence, Cloud and service provider data in over 35 countries. From certified high-assurance hardware, and

platform and deliver security without compromise. © SENETAS CORPORATION LIMITED | WWW.SENETAS.COM
