

NETWORK INDEPENDENT ENCRYPTION

MEETING THE EVOLVING NEEDS OF TODAY'S NETWORKS.

CONCURRENT MULTI-LAYER ENCRYPTION

As networks become increasingly virtualised and borderless, the need for a single high-assurance encryption security solution has increased. Senetas Network Independent Encryption solutions offer just this.

The exponential growth in Cloud-enabled services and applications has seen organisations' data networks become increasingly multi-Layer, particularly in the use of Layers 2 and 3 (Ethernet and Internet).

DESTINATION POLICY BASED

Data centre

Head office

Branch office

Cloud computing

SUPPORTS ALL CLOUD & WAN TOPOLOGIES

Point-to-point

Point-to-multipoint

Hub & spoke

Fully-meshed

Senetas is a leading developer of encryption security solutions; trusted to protect enterprise, government, defence, cloud and service provider data in over 40 countries. From certified high-assurance hardware, and virtualised encryption, to secure file sharing and collaboration with data sovereignty control, all are based on the same crypto-agile platform and deliver security without compromise.

Senetas encryption solutions are distributed and supported internationally (outside Australia and New Zealand) by Thales.
