

SureDrop

BY SENETAS

Cyber Security Solutions

Trusted to Protect the World's Most Sensitive Data.
Proudly Made in Australia.

SureDrop is brought to you by **Senetas**, a leading Australian public cybersecurity company specialising in high performance network encryption solutions, both hardware and virtualised, as well as secure file-sharing and storage.

With over 25 years of industry experience, we've earned the trust of governments, defense agencies, and large enterprises across more than 60 countries. Our solutions are certified by the world's most stringent security authorities, including Common Criteria, FIPS, and NATO.

Protecting File-sharing from Privacy Breaches and Data Theft.

Advanced encryption, file fragmentation, 100% file location control and sovereignty for **maximum workgroup security**.

SureDrop is Secure By Design.

Developed as a security solution, SureDrop provides a secure workforce file-sharing, storage and collaboration environment without compromising performance or ease of use.

It's the convenient 'box-type' solution users love, and your IT department will approve. Includes all the file-sharing features and tools you have come to expect, but with best-in-class security.

The safest way to share files

You want the convenience of a user friendly file-sharing and collaboration tool, but you won't compromise security. SureDrop is built using advanced cybersecurity features – standards based encryption best practices and file fragmentation. There is no safer way to store and share your files.

100% file and encryption key location control and sovereignty

SureDrop differs from most file-sharing and storage applications in that it offers 100% control over file location and sovereignty, and also provides a root of trust through encryption key control.

Flexible and scaled solution

SureDrop offers flexible cloud, on-premises, or hybrid deployment options, scaled to suit your needs.

Microsoft 365 and enterprise integration

SureDrop offers optimal Microsoft 365 integration for workflow convenience. Seamless integration with Microsoft Active Directory and Azure is also provided.
