

Unbreakable Encryption for Modern Military Networks

Secure critical communications across sea, air, space, and autonomous platforms with our adaptable, high-assurance encryption solutions, designed for the demands of modern military operations.

Network Encryption

Senetas high-assurance network encryptors provide robust, high-speed protection for critical data across government and defense networks globally.

Our dedicated hardware solutions, featuring state-of-the-art key management and crypto-agility, ensure authenticated, end-to-end encryption for sensitive data, including cloud, data center, and classified information.

Our encryption is designed around three core principles:

- **Network Agility:** Seamless encryption across any network environment.
- **Crypto Agility:** Future-proofed security with upgradeable algorithms, defending against evolving threats like quantum computing.
- **Platform Agility:** Ruggedized, adaptable encryption for diverse platforms, from autonomous vehicles to remote deployments.

The product line ranges from ultra-fast 100Gbps devices for large-scale data networks to ruggedized units supporting 10Gbps for secure field operations, alongside rack-mounted options for carrier-grade Ethernet. Complementing these hardware offerings is a virtualized network function designed for large-scale WAN/MAN encryption, providing flexible, software-defined security.

Secure File Sharing

Empower your agency with secure file-sharing that doesn't sacrifice usability.

SureDrop by Senetas combines robust, 'secure by design' encryption with the familiar convenience of box-type solutions, ensuring both user adoption and IT department approval, all while meeting the strictest data sovereignty requirements.

About Us

Senetas is a trusted Australian cybersecurity leader with more than 25 years of experience protecting sensitive data in more than 60 countries.

As a public company, we specialize in innovative network encryption solutions that deliver quantum-resistant and crypto-agile performance without compromising speed or user experience. Our award-winning technology is certified by top security authorities and delivered worldwide in partnership with Thales, a global leader in advanced technologies.

Partnering with Honeywell for the AUKUS Submarine Industrial Base program.
